## PROFILE

---

Highly motivated and self-driven software developer who is currently working as a web developer. I studied mostly programming, Data Structures, and Software Architectures, using Java and C#. I focused more on JavaScript in my spare time and in Node.js. I love to learn about new technologies. My current focus is to get more experience in efficient and robust code, either on the front-end or the back-end side of websites and web applications.

## GENERAL SKILLS

---

### Web

· JavaScript/Typescript, Node.js, HTML5, CSS3

### Software Development

· C#, Python (Beginner)

## EDUCATION

---

2011-2014      B.Sc. Computer Science, *Manchester Metropolitan University*, Grade : First-class honors

Relevant Courses : *Advanced programming, Algorithms and Data Structures, Software Architecture, Information Systems, Artificial Intelligence, Operating Systems and Networks, Web and Multimedia*

2006-2009      Student, *Kykkos A' Lyceum Nicosia*, Grade : 17/20

## EXPERIENCE

---

October 2015-present      Web Developer, *Betologic*

- Using Typescript and C# to develop new features for existing and new clients
- Collaborating with the different teams to ship bug fixes, while simultaneously ensuring new functionality is working as intended.

## PROJECTS

---

Some of my projects include

- A node module that was used to return random numbers, strings, objects and more.
- A Pomodoro timer that focuses on responsive design for mobile and desktop browsers with Stylus as the CSS preprocessor.
- A simple Node.js utility that checks whether GitHub is up or facing issues that is run from the command line and gives a formatted message and the status code received.
- An express app I used as a base to get an understanding of templating engines. Deployed on Heroku, it presents the user with a random order of text.
