PROFILE

Highly motivated and self-driven software developer who recently graduated from Manchester Metropolitan University. I studied mostly programming, Data Structures, and Software Architectures, using Java and C#. I focused more on JavaScript in my spare time and in Node.js. I love to learn about new technologies and one thing I want to get more experience in is efficient and interactive design for websites, with minimal load times.

GENERAL SKILLS

Web

· JavaScript, Node.js, jQuery, HTML5, CSS3

Software Development

· Java, C#, Ruby, Haskell

EDUCATION

2011-2014 **B.Sc. Computer Science, *Manchester Metropolitan University*, Grade : First-class honors**

Relevant Courses : *Advanced programming, Algorithms and Data Structures, Software Architecture, Information Systems, Artificial Intelligence, Operating Systems and Networks, Web and Multimedia*

2006-2009 **Student, *Kykkos A' Lyceum Nicosia*, Grade : 17/20**

EXPERIENCE

Summer of 2013 and 2014 **Administrative assistant, *Y.Polycarpou Motors***

- Assisted in car inspection and car service
- Assisted with general business administration tasks

2009-2011 **Soldier/Driver, *Cyprus Army***

- Driving high ranking officers in areas of importance in a timely and efficient manner
- Worked under the engineers in maintaining and servicing vehicles and equipment

PROJECTS

Some of my projects include

- A sketchpad written with jQuery that allows a constant white over a lime background, randomized colors instead of white or white color with a changing opacity to simulate a trail
- A Pomodoro timer that focuses on responsive design for mobiles with Stylus as the CSS preprocessor
- A simple Node.js utility that checks whether GitHub is up or facing issues that is run from the command line and gives a formatted message and the status code received.
